Dreamcatcher Instructions
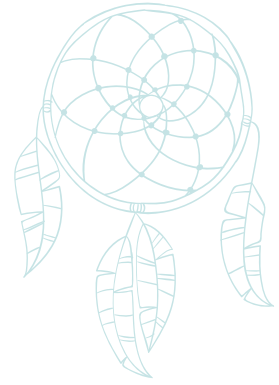

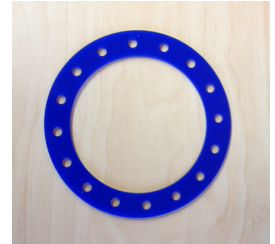

Resources:

- Cardboard cut into a hoop shape OR use a paper plate
- Wool or string
- Feathers
- Beads
- Scissors

1. Collect a length of string.

2. Collect either a piece of cardboard cut into a hoop shape OR use a paper plate with the centre removed. Either option must have holes punched around the outside.

3. Tie the wool through one of the holes.

4. Weave the wool between the holes to create your own pattern. Once the wool has passed through each hole, tie it off and extend it upwards so it can be used for hanging.

5. Take another piece of wool or string. Tie one end to a bead. Repeat this three times.

6. Take two or three feathers. Place them together and push them through the hole in the bead. Repeat this three times.

7. Push two more beads down along the string, using them to secure the feathers in place. Repeat this three times.

8. Attach the feathers to the hoop. Ensure they are opposite the long piece of string which will be used for hanging your dreamcatcher.
