

My Journey

Thank you for agreeing to share your journey through education. The aim is for students to understand the various pathways people take to achieve education and career goals and to raise awareness about Higher Education.

1. Did you go to pre-school? What did you enjoy doing there?

2. Where did you go to primary school? What was your favourite subject and what did you like the least?

3. Where did you go to high school? What is your fondest memory?

4. Describe the journey you took after you finished high school. For example, did you go to university right away or did you get a job or travel first? Have you had any careers other than teaching? Where did you study and what qualifications did you obtain?

5. What was your university like? What sticks in your mind about your uni days?

6. Are there any other comments you'd like to make to encourage students to consider Higher Education as an option?
